**Title of the Seminar:** TMSA requirements: The Oil Majors' perspective

**Dates:** 30 September 2014

**Course Objectives**

To provide useful insight of the TMSA requirements to all ranks of the Shipping Companies' Employees, with respect to the Key Performance Indicators and Best Practices guidance established by OCIMF, as well as analysis of common remarks and observations raised by Oil Majors representatives during TMSA Office audits.

**Seminar Syllabus**

The various Oil Majors perspective regarding the interpretation and implementation of the TMSA requirements will be presented. During the seminar the following Oil Majors requirements will be examined:

- EXXON / IMT - MESQAC
- BP
- TOTAL
- SHELL
- PETROBRAS
- CHEVRON
- CONOCO – PHILIPS, etc.

Special focus will be placed on presenting the required aspects of commitment from all levels of the shipping Company's organisation to ensure an effective Safety, Quality, Health and Environmental Management System. This will safeguard adequate performance in terms of:

- HR operations (for both shore-side and vessels' personnel);
- Shipboard operations;
- Maintenance;
- Monitoring, analysis and improvement of the operations;
- Analysis of incidents and undesirable events;
- Identification of trends;
- Benchmarking;
- Environmental compliance;
- Assessment of risks during normal operations and in time of routine or significant changes.

The KPIs established by OCIMF, as well as the recommended Best Practices for compliance will be used as the basis for the presentation, complemented by analytical discussion about accumulated common findings related to omissions, inconsistencies or sub-standard performances, as they are identified by Oil Majors' Auditors during more than 200 actual Office audits.

Who should attend?

Course provided is valuable for shore based employees of all ranks of shipping companies.
